## Cold Stones

Cold stones alternated with hot stones can provide a therapeutic balance. Some benefits of cold stones: disperse congestion, alleviate swelling, interrupt muscle spasms, stimulate the autonomic nervous system, increase metabolism and invigorate. Alternating cold and hot stone application is not a treatment for everyone. If a client is prone to being cold day to day, or has mild circulatory problems, it is recommended that the client experience a hot stone massage only.

## Chakra Products

The seven chakras are the major energy centre within the body. Through these chakras, we receive and transmit physical and spiritual energy. The word 'chakras' literally translated from Sanskrit Hindi, means 'wheel of spinning energy' and Ancient Eastern masters formulated that each of these energy centre have an associated colour, spinning in a clockwise direction. The ideal, for optimal wellbeing, is to have all the chakras centres clear, balanced and vitalised. Gemstones and crystals can be used for clearing, revitalising and healing, by placing the corresponding colour at each chakra centre.
