

Poron® Sheeting

Microporous polyurethane foam with a world-wide reputation as a durable high performance underfoot cushioning material with excellent shock absorption properties.

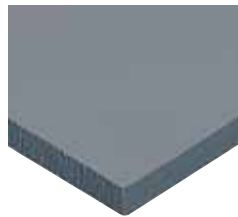

Poron® XRD

PORON XRD is the choice for extra impact protection. It is soft to the touch, light weight, contouring and testing confirms that it absorbs more than 90 percent of energy upon repeated impact.

- Breathable
- Sheet Size: 1.3 x 1 m

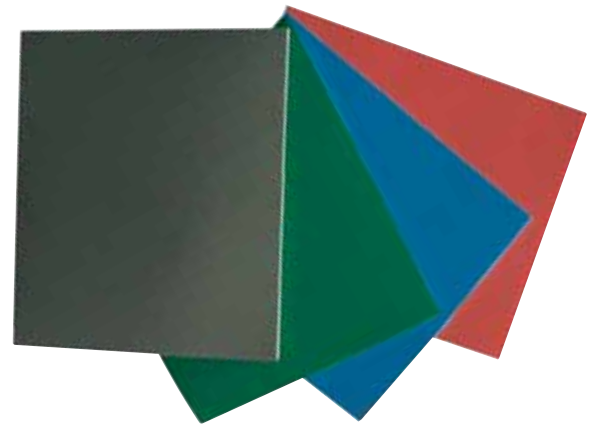

8829-3	Poron XRD 3.2mm	£24.95
8829-6	Poron XRD 6.35mm	£39.95

Poron® 4000 Grey - High Performance

- Absorbs and redistributes underfoot pressures
- The material returns to its original thickness in a fraction of a second and will not bottom out
- Each sheet 22.5 x 31.5cm
- Bag of 4 sheets

0446	Adhesive	£18.56
0447	Non Adhesive	£10.66

Poron® 4400 Permafresh Green

- Anti-bacterial, stops the growth of odour causing bacteria and fungus
- Resists the growth of mould and mildew
- Sheet size 137 x 100cm

3498-3	Poron 4400 3.2mm	£27.49
3498-6	Poron 4400 6.35mm	£49.30

Poron® 94 Pink – Slow Memory

- Softer lighter with slower rebound properties
- Provides a better even distribution of body weight over the foot's plantar surface
- Sheet size 137 x 100cm

3501-3	Poron 94 Pink 3.2mm	£30.95
3501-6	Poron 94 Pink 6.35mm	£53.58

Poron® Dual Layer Pink/Blue

- Combines Poron® 4000 and Poron® 94 resulting in a superior dual layer foam
- Ideal for protection against pressure points when used with diabetic shoes
- Permeable to increase ventilation keeping foot cool, dry and odour free
- Sheet size 137 x 100cm

3497	Poron Dual Layer 4mm	£35.72
------	----------------------	--------

Poron® Medical Grade

Medium density microcellular foam material. Will not flatten out. Used in orthopaedic and prosthetic applications.

Contains no plasticisers or processing agents, will not become brittle or crack with age.

Poron® 4708 Blue Medical

- Soft supporting
- Used in orthopaedic and prosthetic applications, including custom orthotics
- Sheet size 137 x 100cm

3504-3	3.2mm	£27.38
3504-6	6.35mm	£44.06

Poron® 96 Green Medical

- Slow memory, rebounds slowly when compressed
- Sheet size 137 x 100cm

3507-3	3.2mm	£33.34
3507-6	6.35mm	£54.77

Podotech® Poron® Gels Sheet

Silver Antimicrobial Surface

Clear Polymer Gel

Poron® 4000

- Poron material laminated to a polymer gel sheeting
- Bottom layer is Poron 4000, top layer is clear gel
- Top finish is silver antimicrobial surface
- Sheet size 40.6 x 45.7cm

3483	Podotech Poron Gel Sheet 3mm	£14.98
------	------------------------------	--------

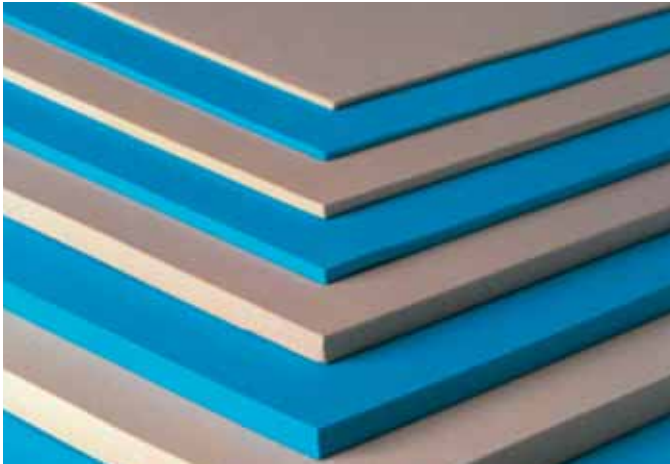

orthotic components

PPT Materials

PPT is an open cell frothed medical grade polyurethane material. PPT material possesses exceptional shock attenuating properties, is extremely lightweight, washable. The material has a very good "memory" and therefore will not thermoform. PPT can be used for many patient applications, orthoses, prostheses, orthopaedic appliances, etc..

PPT Abraded/Smooth

Smooth on one side and abraded on the other for increased ease of adhesion

Sheet size: 30 x 152 cm

8147-BL	PPT Abraded/Smooth Blue 3.2mm	£9.75
8147-TA	PPT Abraded/Smooth Blue 6.4mm	£11.50
8146-BL	PPT Abraded/Smooth Tan 3.2mm	£19.50
8146-TA	PPT Abraded/Smooth Tan 6.4mm	£19.50

PPT Plastazote

PLASTAZOTE: a thermoplastic polyethylene foam and easily heat moulded (85-140°C) The use of a combination of Plastazote /PPT sheets permits the application of a total contact surface (Plastazote) with superior shock attenuation (PPT) in one product.

Sheet size: 48 x 73.5 cm

8148-32	PPT/ Plastazote 3.2mm	£26.50
8148-64	PPT/Plastazote 6.4mm	£29.00

EVA Sheeting

EVA (Ethylene Vinyl Acetate) foam sheeting is a popular choice in the orthopaedic and footwear trades. Lightweight versatile material that is shock absorbing and very hard wearing. EVA grinds easily, mouldable between 120 to 170C, oven time 2 minutes per mm. EVE Based insoles retain their shape, reflect body heat and last on average for one year. Thin sheets can be used as base for cut-outs to which metatarsal and valgus pads are added.

EVA Low Density White

- Commonly used for shock absorption, shoe uppers in temporary shoes and as soft stabiliser in AFO's
- Shore hardness A25, low
- **Sheet size 100 x 100cm**

3521-03	3mm	£5.95
3521-06	6mm	£9.84
3521-12	12mm	£19.69

EVA Medium Density Blue

- Commonly used for heel lifts, shoe beddings, moulded insoles and as semi-rigid stabiliser
- Shore hardness A50, high
- **Sheet size 115 x 92cm**

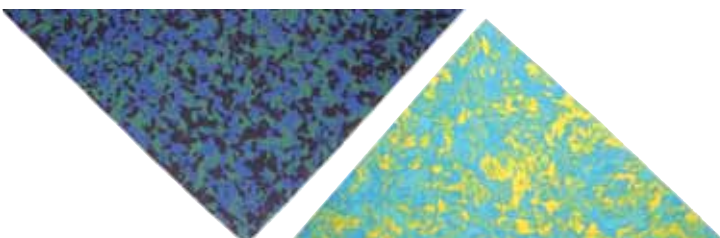

3515-03	3mm	£5.61
3515-06	6mm	£11.21
3515-10	10mm	£18.77
3515-12	12mm	£22.43

EVA High Density Red

- Commonly used for shoe lifts, heel lifting, block heels, wedge bottoms, rigid insoles
- Shore hardness A65, High/Ultra high
- **Sheet size 100 x 80cm**

3510-03	3mm	£6.87
3510-04	4mm	£9.16
3510-06	6mm	£13.73
3510-12	12mm	£27.47

Multi-Colour EVA Sheeting

Low Density

- Colour: Green, Blue & Yellow
- **Sheet size 100 x 100cm**
- Shore hardness A34, low

4750-1	1mm	£5.72
4750-2	2.5mm	£6.87

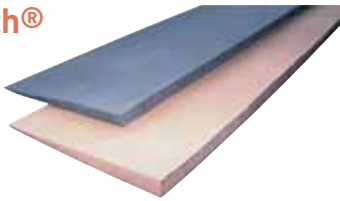

Medium Density

- Colour: Green, Blue & Black
- **Sheet size 105 x 95cm**
- Shore hardness A50, high

3525-1	1mm	£8.59
3525-3	3mm	£12.59

orthotic components

Podotech® Wedge Strip

- High Density EVA
- Adhesive backed
- Pre-cut into wedge shape
- Shore hardness A65, high/ultra high
- Adult size 6 -8
- Size 95 x 8cm
- Grey 3.5° & Beige 5°

3490-A3	Adhesive 3.5° Grey	£3.20
3490-A5	Adhesive 5° Beige	£3.50
3490-N3	Non adhesive 3.5° Grey	£ 2.85
3490-N5	Non adhesive 5° Grey	£ 3.20

Podo® Wedge

- High Density EVA
- Pre-cut into wedge shape
- Shore hardness A65, high/ultra high
- Choice of adhesive or non adhesive backed
- Size 95 x 8cm
- Supplied in pairs
- Grey 3.5° & Beige 5°

3491-06	3.5° Child sizes 6-10, pair	£1.41
3491-10	3.5 Child size 10+, pair	£1.41
3492-36	3.5° Adult size 6-8, pair	£1.46
3492-39	3.5° Adult size 9+, pair	£1.46
3492-56	5° Adult size 6-8, pair	£1.51
3492-59	5° Adult size 9+, pair	£1.51

Hapla EVA Wedges

- Self adhesive
- 30 x 7cm
- Pack of 6

2445-3	3° White, pk/6	£8.60
2445-4	4° Black, pk/6	£8.60
2445-5	5° Yellow, pk/6	£8.60

Evalon Posting Wedge Strip

- Evalon foam material
- Pre-cut into wedge form strips for postings and tapered edges for raises
- Alternative to EVA
- Shore hardness A50, high
- Choice of adhesive or non adhesive backed
- Size 30 x 7cm

Adhesive Backed

3556-3	3° White	£1.19
3556-4	4° Black	£1.19
3556-5	5° Yellow	£1.19

Non-adhesive Backed

3551-3	3° White	£1.08
3551-4	4° Black	£1.08
3551-5	5° Yellow	£1.08

Adhesives

Renia Primer for PU

- Use with Renia Ortec when bonding Poron material
- Polyurethane Primer

3590 Primer for PU 85ml £4.00

Renia Colle De Cologne Cement

- All purpose neoprene cement
- Used for bonding rubber, EVA, TR, felt, cork and leather
- Workable for up to 45 minutes when open

3589 Colle De Cologne 1 litre £6.08

Renia Ortec

- Flexible, sweat and water resistant
- Dries clear
- Used for bonding Poron, Evalon, plastics, leather, rubber and foams
- Workable for up to 60 minutes when open, can be reactivated when heated
- Toluene free

3588 Ortec 1 litre £9.44

Renia Rehagol for TR

- Use with Renia cement when bonding PVC material

8796 Rehagol for TR 85ml £4.00

PreFix Spray Adhesive

- Heavy duty aerosol adhesive

3587 Pre Fix Spray £2.64

Double Sided Tape

3586-26	25mm	£3.37
3586-60	60mm	£7.86
3585-100	100mm	£7.86

orthotic components

Foot Impression

Foot Impression Box

- Quick simple method to obtain impression of patient foot
- Choice of two size depths
- Box size 16 x 34cm

3428	Standard 40mm	£1.15
3429	Deep 55mm	£1.50

Foot Impression Sheets

- For measurement of foot pressure regions
- No inks required
- Sheet size 19.5 x 35cm
- Pack of 100 sheets

2486	Foot Impression Sheets, pk/100	£67.50
------	--------------------------------	--------

Foot Measurement

Insole Template Set

- Polyethylene
- Seven sizes
- For custom insole manufacture

3430	Template Set	£25.00
------	--------------	--------

Goniometer

- Transparent plastic

3431	Goniometer	£8.00
------	------------	-------

Foot Measure

- English and metric sizes
- Plastic

3432	Foot Measure	£17.00
------	--------------	--------

Angle Finder

- Inclinator
- Measures 0° to 90°

1953	Angle Finder	£7.95
------	--------------	-------

Casting

Gypsona Plaster of Paris Bandage

- Fast Setting
- Choice of 2.7m Roll or Slab Gypsona

3389	7.5cm Roll	£1.50
3390	10cm Roll	£1.95
3391	15cm Roll	£2.70
3392	20cm Roll	£3.70
3393	5ply Slab 10cm x 20cm	£59.75
3394	5ply Slab 15cm x 20cm	£72.00

Variban Undercast Padding Bandage

- 3.5m Roll

	Save More	1	12+
3398-05	5cm Roll	£0.60	£0.42
3398-07	7.5cm Roll	£0.70	£0.55
3398-10	10cm Roll	£0.90	£0.68
3398-15	15cm Roll	£1.13	£1.02
3398-20	20cm Roll	£1.50	£1.36

Cast Edge Padding

- Adhesive padding material
- Hypoallergenic
- Air permeable
- For padding edges of plaster and synthetic casts

	Save More	1	4+
3395	8cm x 5m	£19.25	£17.25

Otoform KC Silicone
- formerly 'Otoform K2'

- Otoform-K2 is a soft and easily kneadable impression material used with a hardening paste
- Both the 800g & 170g are supplied with hardener

2487	KC 800g with 20g Hardener	£19.95
2488	KC 170g with 5g Hardener	£12.00
2489	Otoform Hardener	£5.25

Bland-Rose Silicone Soft

- The ideal silicone for palliative orthosis.
- Its presentation as a paste makes it extremely easy to handle.
- Soft, elastic and smooth to the touch.
- Causes no discomfort, is washable, reusable and provides immediate relief from pain.
- Its medicinal oils lubricate the skin, softening and regenerating the affected areas

2061	Silicone Soft 500g	£33.60
------	--------------------	--------

Bland-Rose Silicone Medium

- The ideal silicone for palliative orthosis.
- Its presentation as a paste makes it extremely easy to handle.
- Soft, elastic and smooth to the touch.
- Causes no discomfort, is washable, reusable and provides immediate relief from pain. Its medicinal oils lubricate the skin, softening and regenerating the affected areas

2480	Silicone Medium	£33.60
------	-----------------	--------

Bland-Rose Catalyst

- Liquid Catalyst used for mixing all Bland-Rose silicones

2062	Catalyst 20ml	£5.30
------	---------------	-------

Bland-Rose Starter Kit with DVD

The Bland Rose Starter Kit has everything you need – soft and medium putties, Reaktol catalyst and an instructional DVD.

2479	Starter Kit	£16.55
------	-------------	--------

Bland-Rose Duo System

- DUO 10 is a bi-compound 1+1 mixable soft silicone.
- Easy to use: to make an orthosis, mix the same quantity of the two components (A+B)
- The mixing process takes approximately 5 minutes to form a solid. Hardness Shore A 10 is achieved 24 hours after the orthosis is created
- Non irritant, washable and reusable.

2481	Duo System 2x 250g	£36.35
2482	Starter Pack	£22.75
