LCN foot care is an innovative, results-driven product range from Germany and is successful in more than 60 countries.

Wilde-Pedique is the only UV gel on the market designed specifically for the reconstruction of toenails. The finished nail is non porous, light, flexible and durable, has excellent adhesion and contains the anti-mycotic agent Piroctone Olamine. At a cost of approximately 50p to reconstruct a big toenail, it is an excellent revenue stream. Wilde-Pedique is easy to use but training is also available.

Applications include:

- Building a new nail on nail spurs after a TNA
- Disguising unsightly nails
- Replacing nails lost through trauma
- Onychia - coating the reduced nails to prevent bacterial attack
- The choice of 6 shades to please both you and your clients

Reconstruct a nail with 3 simple steps

After degreasing and disinfecting the nail with Cleaner:

Step 1 - Apply layer of Wilde-Pedique and cure under light. Do not wipe

Step 2 - Apply second layer, cure under light, wipe with Cleaner and smooth surface with file

Step 3 - Apply Pediseal for a high gloss, smooth finish, cure under light and wipe with Cleaner
